Non Surgical Hair Replacement

Q. What is Non-surgical Hair Replacement?

A. Any external hair bearing device added to existing hair or scalp to give one the appearance of a fuller head of hair. (Hair Weaves, Hair Extensions, Hair Pieces, Toupees, Non-Surgical replacement, Partial hair prosthesis, hair wefts, etc.) Devices may consist of human hair, synthetic fiber or a combination of both.

Q. How is it kept on?

A. Partial hair additions are attached in a variety of techniques. Either existing hair or the skin is the anchor sites.

What is Non-Surgical Hair Replacement?

Any external hair bearing device added to existing hair or scalp to give one the appearance of a fuller head of hair (ie: hair weaves, hair extensions, hair pieces, toupees, non-surgical hair replacement, which consists of: partial hair prostheses, hair wefts or tracks.

What is a Prosthesis?

From Wikipedia, the free encyclopedia

Prosthesis, an artificial appliance used to replace a lost natural structure; provided, however, that prosthesis shall include, but not be limited to, artificial arms, legs, breasts, scalp hair or glass eyes. The plural for *prosthesis* is *prostheses*.

Scalp hair prosthesis is an artificial substitute for scalp hair. Hair prostheses are custom made and fitted to the shape and size of the person. They are handmade, colored and constructed. The ventilated hair is applied to the prosthetic hypoallergenic scalp skin. Men, women and children over the age of 5 can wear a cranial prosthesis.

Wigs Versus Prosthesis

There is a drastic difference between a wig and a cranial hair prosthesis. Doctors prescribe a prosthesis for patients who have lost their hair resulting from medical conditions such as [alopecia areata](#) (a genetic disorder affecting the autoimmune system), [trichotillomania](#), [chemotherapy](#) or any other clinical disease or treatment resulting in [hair loss](#). Cranial prosthesis also help protect disease-weakened immune systems from [ultraviolet radiation](#) as well as regulating the bodies' temperature.

Pre-Designed Prosthesis

This is a hand-tied to create a more natural look and provide for better and more comfortable fit. This comes in various cap sizes

How Are They Kept On?

There are a variety of techniques in which partial hair additions are attached or existing hair or skin is the tape tabs. Options are:

- Pre-designed Prosthesis
- Hair Alteration
- Hair Intergration
- Partials
- Head Bands, Hats, Scarves, headbands with or without hair.

Pre-Designed Prosthesis

What Is A Cranial Prosthesis?

A cranial hair prosthesis is a hair system designed specifically for those experiencing hair loss due to medical conditions. The prosthesis contains a combination of fabrics and compounds that are used to re-create natural hair growth patterns and the look of the scalp.

VACUUM FIT PROSTHESIS

Vacuum Fit Prosthesis can be made from several different materials:

1. Fiberglass
2. Silicon
3. Combination of Copolymer

Vacuum fit bases are available in both "hard shell" design and in "soft base". The mold must be for precise fit.

Hair Alteration

A lot of celebrities wear hair alteration.
because it allows the hair to rest.

A capless design using hand crafted crocheted polyester cable, ventilated with 1-3 strands of hair, giving the illusion that the hair is growing out of the scalp. It is comfortable, light and airy. This is mainly a solution for many hair problems like hair to rest.
